

ERVIN TEST CENTRE

Glaubitz, Germany

Optimize Your Blasting Process at Our Test Centre!

Abrasive quality isn't just about consumption – it is about efficiency, productivity, and energy savings. At our state-of-the-art Test Centre, we help you find the perfect abrasive to reduce blasting time, lower energy consumption, and improve overall performance.

Test, compare, and optimize your process to cut costs and boost productivity. Book your trial today!

Applications Simulated

- **Cleaning** – Removing rust, scale, and coatings
- **Peening** – Enhancing material strength and fatigue resistance in high-stress components
- **Surface Preparation** – Optimizing adhesion for coatings, paints, and other treatments
- **Deburring** – Removing excess material from machined or cast parts
- **Shot Blasting & Grit Blasting** – Testing different abrasives to achieve the best balance of cost savings, efficiency, and surface finishes
- **Degreasing** – Removal of oil and grease from blasting process

Why Choose the Ervin Test Centre?

- Reduce your total cost of blasting – abrasive price is only a small factor
- Improve your productivity
- Save energy, improve sustainability.
- Customised solutions

Industries Supported

- Automotive
- Aerospace
- Rail
- Foundry & Forge
- Construction & Infrastructure
- Energy & Renewables
- General Manufacturing
- Surface Preparation
- Defence

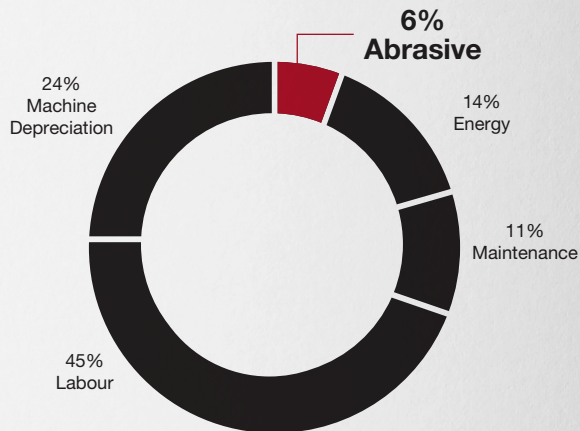

Book your trial today and discover how the right abrasive can transform your blasting process!

Total Cost of Blasting

Correct selection of a quality abrasive can affect more than just the purchase price of abrasive.

Based on 4 x 11 kW wheel machine for surface preparation
